Empathy Map – Voice-Based Concept Understanding

SAYS	THINKS
"I want to explain the concept clearly."	"Did I explain all the important concepts?"
I hope the system understands my explanation correctly."	"Will my explanation match the expected answer?"
"I want accurate feedback on my performance."	"Am I speaking fluently without too many pauses?"
"This tool should help me improve my communication skills."	"How can I improve my conceptual understanding and confidence?"
DOES	FEELS
Records or uploads a voice explanation of a selected topic.	Curious to know how well the concept was explained.
Speaks naturally while explaining the concept.	Slightly nervous while recording the explanation.
Reviews the generated transcript and evaluation report.	Motivated after receiving personalized feedback.
Analyzes semantic similarity scores, fluency metrics, and AI feedback.	Confident when achieving high semantic similarity and fluency scores
