

Customer Journey Map

Date	10/07/2026
Name	Karuru Arjun
Project Name	Voice-Based Concept Understanding Analyser (VBCUA)
Maximum Marks	2 Marks

Customer Journey Map:

Phase of Journey	Stage 1 Application	Stage 2 Verification & Prediction	Stage 3 Approval Decision
Actions What does the user do?	• Opens the application. • Selects a concept/topic. • Records or uploads a voice explanation. • Submits the audio for analysis.	• Waits while the system transcribes speech using Whisper. • AI compares the explanation with the reference concept. • Speech fluency and semantic similarity are analyzed.	• Views transcript and evaluation scores. • Reviews AI-generated feedback. • Downloads the PDF report for future reference.
Touchpoint What part of the service do they interact with?	• Streamlit web interface. • Topic selection page. • Audio recorder/upload module.	• Speech-to-Text (OpenAI Whisper). • Sentence-BERT semantic analyser. • Librosa audio processing module.	• Interactive dashboard. • Performance report page. • PDF download option.
Customer Thought What is the user thinking?	• "Did I explain the concept clearly?" • "Is my recording good enough?" • "Will the system understand my explanation?"	• "How accurate is my explanation?" • "Did I miss any important concepts?" • "How fluent was my speech?"	"How can I improve my score?" • "Which areas need more practice?" • "Can I use this feedback to improve my communication skills?"
Customer Feeling What is the customer feeling?	Curious, slightly nervous, and eager to begin.	Interested and excited while waiting for AI evaluation.	Happy and confident with good scores; motivated to improve if improvements are suggested.
Process Ownership Who is responsible?	User (Student/Learner)	AI Engine (Whisper, Sentence-BERT, Librosa & Evaluation Module)	VBCUA Reporting Module & User
